

HP-RC

HIGH PRESSURE RAILCAR DISC

Oseco's HP-RC (High Pressure Railcar Disc) is constructed of durable Ryton Plastic. Ryton gives excellent corrosion resistance and resists premature bursting during humping caused during coupling of railcars. The HP-RC fits the standard threaded or bolted railroad tank car safety vent. Fluoropolymer liners are on both sides of the disc.

Oseco's HP-RC railcar disc resists corrosion and failure caused by coupling.

- Sizes 3" and 5"
- Rated to burst at 165 psig
- Consists of Ryton with Fluoropolymer linings on both sides
- Damage resistant
- Resistant to premature rupture during coupling and switching
- Excellent for highly corrosive applications
- Meets AAR Requirements

Common Applications
Tank Cars
